

UPDATED · JUNE 25, 2026

HireLight

Identify top candidates at a glance.
Faster screening, fairer decisions, less manual work.

CONTACT · info@whattadata.it

— THE PROBLEM

CV screening is broken

Recruiters spend hours on repetitive screening while quality, consistency, and visibility stay hard to control.

01

Scattered manual workflows

Applications arrive from emails, portals, and forms, then get reviewed one by one. Volume rises faster than quality.

02

Subjective shortlisting

No shared rubric means bias, inconsistent decisions, and strong candidates can be missed too early.

03

No performance visibility

Without structured data, teams cannot measure cycle time, funnel quality, or where decisions improve.

Modern Measures of Talent Acquisition

— THE SOLUTION

The HireLight Intelligence Layer

Turning fragmented CVs into structured, explainable candidate signals in minutes.

01

Structured Signal Extraction

Skills, experience, education, and context are transformed into comparable signals HR teams can act on.

02

Bias-Aware Scoring

The scoring layer focuses on **experience and education**, reducing demographic noise and supporting AI Act-ready transparency.

03

Proactive Talent Matching

Unlike a passive ATS, HireLight surfaces fit, risk, and next actions as soon as a CV enters the pipeline.

— ARCHITECTURE

The Engine Under the Hood

A modular, cloud-native pipeline designed for scale, privacy, and adaptation.

28+

Orchestration Steps

Parse attachments, normalize CV data, score candidates, and trigger the next action automatically.

Hybrid

Multi-Channel Intake

Start with email, then extend to LinkedIn, Indeed, career pages, and HR portals through APIs.

Jury

Model-Agnostic Intelligence

Use local LLMs, OpenAI APIs, or a model jury to balance privacy, cost, and reliability.

Automation

AI Scoring

Candidate Data

Hiring UI

Competitive Landscape

Where HireLight fits between legacy HR systems and enterprise talent-intelligence suites.

Platform	Category	Key Strength	Ideal Org. Size
HireLight	Active Intelligence	Explainable scoring & SME compliance	10 - 5,000+
Eightfold AI	Talent Intelligence	Predictive AI for workforce planning	5,000+
HiredScore	AI Screening	ATS overlay and auditable AI	500+
Juicebox AI	AI Sourcing	Natural-language talent sourcing	10 - 500+
HiBob / Personio	Mid-Market HRIS	Integrated HR analytics and GDPR focus	50 - 1,000

Model Jury

Consensus scoring reduces hallucinations and single-model bias.

Bias-Aware Core

Risky demographic signals are filtered before scoring.

SME-Ready Compliance

AI Act transparency without enterprise-only pricing.

Business Model

An accessible pricing model built for adoption, compliance, and scale.

DISTINCTIVE POSITIONING

The Compliance Democratizer

Enterprise-grade transparency for SMEs, without enterprise-grade cost or complexity.

SCALABILITY MOAT

Lean, Modular Delivery

Low-overhead automation and API layers keep deployment fast and customization practical.

SME-READY PRICING

Starter

Free to €99/mo

Up to 100 CVs/mo.
Explainable scoring.

Growth (Mid)

€299/mo

Up to 1,000 CVs/mo.
Model-jury scoring.

Enterprise

Custom volume

Unlimited volumes.
Local LLM or on-prem.

— THE TEAM

Who we are

A cross-functional team spanning product, AI, engineering, research, and design.
